EDUCATION

Carnegie Mellon University, Pittsburgh, PA ***Aug. 2026 – Dec. 2027***
Master of Information Systems Management in Business Intelligence and Data Analytics
Coursework: Database Management, GenAI Lab, Econometrics, A/B Testing, Statistics, IT Project Management, Design AI Products

New York University, Brooklyn, NY ***Sep. 2022 – May 2026***
Bachelor of Science in Computer Science; *Minors: Mathematics, Game Engineering*
Coursework: Data Structures, Algorithms, Operating Systems, Computer Architecture, Computer Networking, Computer Security
Honors: CSE Leadership Award, Dean's List | **Study Abroad:** NYU Shanghai & VinUniversity (Hanoi, VN)

TECHNICAL SKILLS

Languages: Python, C++, Java, SQL, TypeScript/JavaScript, Swift | **AI:** OpenAI/Claude/Gemini API, multi-agent LLM systems
Frameworks: React, React Native (Expo), Angular, FastAPI, SQLAlchemy, SwiftUI, SwiftData, Zustand, Pandas, OpenGL, SDL
Cloud & Data: AWS, Docker, Linux/UNIX, PostgreSQL, Supabase, Firebase, Render, Vercel
Tools & Concepts: Git, CI/CD, REST APIs, OAuth 2.0, unit/integration/E2E testing, TCP/IP, mypy, Ruff, Xcode, TestFlight

PROFESSIONAL EXPERIENCE

Amazon (Whole Foods Market) | *Systems Development Engineer Intern* ***May 2025 – Aug. 2025***

- Enabled teams across **40+ AWS accounts** to review any EC2 instance's past state by building **Python and Athena pipelines** that **snapshot infrastructure metadata** into an internal resource dashboard
- **Reduced historical infrastructure storage footprint by 45%** by **re-architecting distributed ingestion and processing** with AWS Lambda, CDK, S3, and CloudWatch, while preserving query access to historical data for downstream analysis
- **Eliminated 40% of recurring manual reporting** effort by building **QuickSight dashboards on Athena-backed datasets**, adopted by six customer teams outside my organization to track infrastructure health and trends

NYU FAS (Computer and Information Technology) | *Student IT Support Technician* ***Jan. 2024 – Dec. 2025***

- **Resolved 15+ weekly tickets** across macOS/Windows devices, including network connectivity issues (Wi-Fi, VPN, DNS, IP configuration), software installs, and hardware repairs, while streamlining department asset tracking

PROJECTS

Relay: Personal CRM | *TypeScript, React Native (Expo), Zustand, Supabase, Groq, OpenAI* ***Jul. 2026 – Present***

- Enabled **full offline use across a 14-entity data model** by building a **persisted mutation queue** over Zustand/AsyncStorage that reconciles local writes against Supabase on reconnect, shipped to TestFlight via EAS
- Built **LLM-powered note extraction and message drafting** on Supabase Edge Functions using Groq-hosted open-weight models, plus **OpenAI voice-note transcription**, with models swappable through environment secrets
- Made core logic testable without a device or simulator by extracting recommendations, reminder scheduling, and contact deduplication into a **framework-independent domain layer** decoupled from all React Native APIs

Jira Service Adapter | *Python, FastAPI, SQLAlchemy, PostgreSQL, CircleCI* ***Sep. 2025 – Dec. 2025***

- Owned ticketing vertical of four-team AI ticket-management system, shipping a **13-endpoint FastAPI service** with **3-legged Jira OAuth 2.0**, automatic token refresh, and OpenAPI-generated typed client
- Hardened client adapter with **idempotency keys, exponential backoff with jitter, and circuit breaker**, validated by **200+ tests** with CircleCI enforcing mypy and Ruff on every push

PantryFlip: AI-Powered Recipe Discovery | *Swift, SwiftUI, Python, FastAPI, IFM K2 Think, Gemini* ***Sep. 2026***

- Generated **6 constraint-validated recipes in ~10 seconds** by building a **multi-agent AI recipe engine** with IFM's K2 Think model and FastAPI, coordinating Chef, Taste, Nutrition, and Optimizer agents under dietary, allergy, and grocery constraints
- Developed a SwiftUI iOS app integrating **Gemini-powered ingredient recognition**, USDA nutrition data, and a **feedback-driven recommender** that learns from rejected and regenerated recipe sets, supported by **237 backend tests**

Conscious: Better Spending | *Swift, SwiftUI, SwiftData, Swift Charts* ***May 2026 – Present***

- **Shipped production iOS app to the Apple App Store**, owning architecture through deployment, with a SwiftData persistence layer and Swift Charts analytics

Hustle Hub Job Board | *Python, FastAPI, PostgreSQL, Angular, Playwright* ***Jan. 2025 – Dec. 2025***

- **Led four-person team** to deliver full-stack job board with **39 REST endpoints** across 6 routers and a 7-table PostgreSQL schema spanning job postings, applications, notifications, and financial resources
- Implemented **JWT auth with applicant/employer/admin role-based access** enforced across 13 Angular pages and API routes, reaching **88% backend test coverage** with pytest plus Playwright E2E tests

LEADERSHIP & ACTIVITIES

AI Club (Treasurer), Theta Tau (Webmaster), Chinese Mei Society (VP), SHPE, ACM@CMU, HackCMU, CS Peer Mentor, Tech@NYU, Summer RA, Beli (Top 0.5% Coffee in NYC), VIPs: High-Performance Computing, Data Analytics & Visualization
